### **WIS 29 off-ramp changes on northbound US 41 in Brown County**

*Motorists exiting to Shawano Ave. under the Mason St. on-ramp*

(Green Bay) The Wisconsin Department of Transportation (WisDOT) Northeast Region office in Green Bay is announcing ramp modifications for drivers exiting northbound US 41 onto WIS 29/Shawano Avenue and traffic entering northbound US 41 from WIS 54/Mason St. starting Thursday, August 22 at 6 a.m. The new location for the WIS 29 northbound off-ramp will be further south near the Mason Street overpass. WIS 29 traffic can safely exit from northbound US 41 near Mason and use the new collector/distributor lanes to access WIS 29/Shawano Ave.

The northbound US 41 on-ramp from Mason St. will continue to use the roundabout to enter northbound US 41 and merge with traffic exiting to WIS 29. The Mason St. on-ramp traffic will follow the collector/distributor lanes, cross WIS 29, and access northbound US 41 via the US 41 entrance ramp from WIS 29

The ramp modifications are necessary to assist construction crews working on US 41. The ramp modifications are expected to be in place for six to eight weeks. Future access to and from northbound and southbound US 41 to both Mason St. and Shawano Ave. will be via the new collector-distributor lanes between Shawano and Mason.

A collector-distributor roadway is a separate roadway paralleling mainline US 41 that will provide improved, safer and more efficient traffic flow between the closely spaced WIS 29 and Mason Street interchanges. The collector distributor lanes will be fully functional by 2016.

**All lane restrictions are weather dependent and subject to change.**

Visit us on [Facebook](#) and follow us on [Twitter](#) for additional details on US 41 traffic impacts and lane closures in Brown and Winnebago counties.
